CSS3, JavaScript
Backend
Node.js, Spring Boot,
Java, Python, C++
Databases
Oracle, PostgreSQL,
SQL Server, MySQL
Tools
Git, GitHub, Docker,
VS Code, Linux

Rodrigo de la Hoz López

Computer Engineer & Software Developer

PROFESSIONAL PROFILE

Computer Engineer specialised in Information Technology with a full-stack profile, focused on building end-to-end software solutions. Experienced in designing interactive user interfaces with React and Angular, implementing backend services with Node.js and Spring Boot, and a solid background in the design, administration and optimisation of databases such as Oracle, PostgreSQL and SQL Server during my time at NTT DATA. Strong learner and team player.

WORK EXPERIENCE

Software Developer | NTT DATA

2026 - Present | Ciudad Real, Spain

- Frontend and backend development for corporate web systems using agile methodologies.
- Integration of backend services and RESTful APIs with relational databases.
- Design, query optimisation and administration of enterprise databases.

EDUCATION

Bachelor's Degree in Computer Engineering

Major in Information Technology
University of Castilla-La Mancha | 2022 - Present (Final Year)

Erasmus Exchange Programme (5 months)

University of Kielce, Poland | 2024

- Technical and academic software projects in multicultural environments; strengthened intercultural skills, adaptability and technical English.

FEATURED PROJECTS

La Gramola Virtual

Angular 19, Spring Boot 3, MySQL, Stripe API, Spotify API

- Interactive web platform for playing music in public venues with dynamic queues.

Spotify to Vinyl

React.js, Node.js, Express, Spotify Web API

- Web app for data visualisation and 3D rendering of vinyl records.

iPokemon2025

HTML5, CSS3, Vanilla JavaScript, PokeAPI

- Web-based battle simulator game focused on usability and responsive UI design.
